

Worldwide Lithium:

Lithium Reserves By Country

Lithium in Chile: Reserves

- ❖ Chile has more than 7 million tons as Li as reserves, representing about 1/3 of total lithium reserves in the world
- ❖ The most important source of lithium in Chile is the Salar de Atacama not only because of the chemical composition of the brine, but also because of its environmental conditions
- ❖ Salar de Maricunga is the second Salar in Chile in terms of its chemical composition
